

## **SAFE ANYWHERE**

F-Secure SAFE is the easy solution for protecting your computer; whether it's a Windows or a Macintosh. This cloud-based solution gives your computer the best Internet protection in the world and also ensures that everything runs smoothly without affecting the performance.

F-Secure SAFE provides everything you need for full, real-time protection. It offers the ultimate protection against viruses, spyware, hacker attacks, and identity theft, while also blocking harmful web sites and online attacks when you are browsing the web. Worry-free surfing, banking and shopping has never been easier. F-Secure SAFE will protect you.

## **HOW DOES IT WORK?**

## **Do you feel that you can safely click on search results?**

Browsing Protection makes sure that you will be safe from phishing and identity thefts. It includes also protection for https-encrypted sites. So when you use Facebook, Gmail, Twitter, or other https-enabled sites, we'll protect you from malicious links and your kids from links with inappropriate content.

## **Do you feel safe when shopping and banking online?**

Banking Protection works as your own personal security guard to ensure that your banking transactions are safe and private. With Banking Protection, you do not need to worry during online banking sessions. Make sure that your money is safe in your account, and avoid surprises.

## **Are you sure your children are safe online?**

With the Parental Control browsing modes, you can define browsing times and web sites that are suitable for your teenagers and small children. You can give your teenagers more freedom to browse the Internet while having tighter restrictions on your small children's online activities.
